Priest in charge.

### A COMMUNICATION

Indianapolis, Ind., Sept. 14, 1920.  
Messrs. F. L. Schultz and Wm. G. Johnson, Editors,  
Spanish-American, Roy, N. M.  
Gentlemen:

Permit me to congratulate you on the very excellence of your publication. I desire also to express my appreciation of the enterprising enthusiasm you have in community welfare. The entire Mesa is receiving benefits from your services which cannot be measured by dollars and cents.

In 1908 I spent several months near Solano, where I have a home-stand and since leaving there I have been kept in touch with affairs through the columns of the Spanish-American. Our mutual friend, Ogden, was an acquaintance and associate in those days. Upon each return to the Mesa I find myself more and more in love with that section, which in a short time will be the garden spot of all New Mexico.

Your stand for good schools, good government, better roads, municipal improvement and development of commercial supremacy through the organization of a Commercial Club is an inspiration and demonstrates what can be done when a live wire is connected with newspaper work.

In mechanical art your publication is superb. Its columns breeze with news and editorially yours is a preaching of conservative optimism savored with good horse sense and reflects a capacity for analysis of needs and conditions of a thriving community which can but mean only the best in prosperity for your territory.

It is a good newspaper printing the news and I am delighted with the showing the business men make in support of the most worthy institution any city may have. A reliable, trustworthy, fair newspaper is a city's biggest asset. May your tribe increase.

Very truly yours,  
JAMES E. FISCHER.

### MOSQUERO MENTIRAS

Mr. Tom Ladd purchased from Mr. Frank Hyatt and shipped to Oklahoma City nine car loads of fat cows from the Mosquero stock pens last week.

Mr. Alfred Kress gathered all of his cattle with the exception of two milk cows and shipped them to the market last week, rented all of the pasture land to Mr. R. M. Lunaford and the farming land to Mr. E. L. Fuller. Mr. Hubert West and Mr. J. F. Smith and will now retire from the stock business.

Mr. John U. Tobler has purchased fifteen lots in the Brown Addition and will erect a modern home thereon in the near future.

Mr. John Hite of Pomona, Calif., has rented the farm and ranch of Mr. E. L. Fuller and is now on his way to Mosquero from California.

Mrs. J. M. C. de Baca has commenced construction of a frame cottage on Cedar street. As soon as completed she will move into the cottage and immediately commence work on a modern stone building which will add materially to the appearance of that part of town. She intends to leave the management of the large ranch and stock interests belonging to her in the Tequesquite Valley to her son, Alonzo, and will reside in town hereafter.

Mr. Sebastian Sales and Miss Maria Aranda were married at the Catholic church at Mosquero Sunday, the 19th and left on the southbound Polly for Cabeza in the afternoon, accompanied by about the entire native population of Mosquero, who went for the purpose of participating in the wedding feast that had been prepared and the grand ball that was to follow. The festivities lasted into the "wee sma' hours of the mornin'" and a general good time is reported by all present.

The forty-acre tract just north of Mosquero that was subdivided into small acreage tracts were practically all sold out in a single day. The majority of those purchasing were Mosquero farmers who will build on the tracts in the near future for the purpose of residing there during the winter and enjoying the benefits of the Mosquero schools. Among those purchasing were Mr. C. W. McNeill, Mrs. Mary Gordon, Mr. J. B. Dugall, Mr. Alfred Kress, Mr. James Galey and various others whose names we did not learn.

Mr. Walter Cottingham, general manager of the Springer Lumber company, who has one of the best lumber yards and hardware stores on the Mesa, made a business trip to Raton Saturday, accompanied by his assistant, Mr. Wm. Foster. Aside from being manager of the lumber company, Mr. Cottingham claims that while Mr. Brown is the day mayor of Mosquero, he, Mr. Cottingham, is the night "mare" of the town. Quite a few of his young friends seem to agree with him in this matter.

Messrs. A. H. McGlothlin, Orren Beatty, J. A. McIntosh, Tony Heiman and J. B. Duvall left for Clayton Sunday afternoon where they will attend the Democratic County Convention and bring home a number of nominations for county offices for people in the south end of the county. Mosquero lying in an extreme corner of the county and in a very inaccessible part of the county, is generally treated as a step-child by the Democratic party of this county and it is hoped to secure a fair representation on the county ticket this fall.

Quite an enjoyable dance was enjoyed by the young people, and incidentally by a few old ones as well, at the new house of Judge J. F. Smith last Saturday night, when a crowd met at the recently erected dwelling house on the Smith farm and proceeded to enjoy the tripping of the light fantastic until the early hours of the morning. A very enjoyable time is reported by all and fully evidenced by the appearance of the young folks Sunday afternoon.

### Do You Want Value for Your Money?

For the good of your pocketbook you ought to know that the S. H. Churchill & Co. line of made-to-measure clothes is recognized the country over as the "Big Value Line of America."

There are some mighty fine suit and overcoat fabrics waiting for you here—the kind that will please you and look well on you. And everyone a quality you can't duplicate anywhere else at the price. Style and value—both. You get these here.

**DOC McCARCO, Roy, N. M.**

**RUMELY**  
**OILPULL**  
TRACTOR  
LA PORTE, IND.

### What "OilPull" Means

DID you ever stop to consider why the OilPull was so named by its makers?

First, it burns kerosene oil—the cheapest fuel obtainable. It was designed for the specific purpose of burning kerosene and is constructed from the ground up to efficiently and economically use this or other low grade fuel oils. Not only this—it is backed by a written guarantee to burn all grades of kerosene under all conditions, and at all loads to its full rated brake horsepower.

Second, it is oil cooled. Water freezes and cracks cylinders—oil will not freeze even at 40° below—no need of draining the radiator. Water boils and evaporates on hot days—oil does not—no need of continually refilling the radiator. Water rusts cooling system parts—oil preserves them. The OilPull oil cooling system automatically keeps the motor at the proper temperature—the harder the OilPull works the cooler it runs.

Third, the OilPull possesses a degree of power or "pull" at draw bar and belt that is equalled by no other tractor of equal rating. Every OilPull will deliver 25% more power than its rating. It will handle all jobs hour after hour, day after day, for years, with a minimum of wear. The first OilPulls built are still on the job after eleven years of heavy, continuous farm work.

The OilPull is built in four standardized sizes—12-20, 16-30, 20-40 and 30-60 H. P.
